1 Introduction

Events (conferences, workshops, public events) constitute the offline channels of communication and dissemination activities promoting the results and various outputs of any research project, further to scientific publications. In the case of ROSiE, dissemination and communication activities, such as events, are in the core of the project's development and progress. Furthermore, due to the project's topic and the synthesis of the consortium, which covers a wide range of principles, the variety of events in which ROSiE can be addressed is wide, giving the opportunity to raise awareness on the project's developments and increase visibility in multiple levels, while interacting with various types of stakeholders.

D8.5: Events contains a list of relevant events in which ROSiE consortium members have participated during the 1st, 2nd and 3rd year of the project (March 2021- 29 February 2024) or plan to participate after the end of the ROSiE project. These events are not necessarily events organized by ROSiE, but events in which ROSiE will be communicated in any way, whether via a ROSiE-related presentation, a panel discussion or informal discussions, so as to raise awareness on the project. This deliverable This deliverable contains all the updates made in the month 3, month 12 and month 24 of the project. In addition, it contains new updates about events that ROSiE organized or participated in from the month 24 to the month 36.
